never left me till warm weather. Just before Xmas last I had a terrible time

with Grip and a cough, also a severe pain in my left side. I had often been

Duffy's Pure Malt Whiskey

Duffy's Pure Malt Whiskey regularly, according to directions, and take no other medicine. It is dangerous to fill your system with drugs; they poison the body and depress the heart, while Duffv's Pure Malt Whiskey tones and strengthens the heart action and purifies the entire system. It is the only whiskey recognized as a medicine, and contains no fusel oil. This is a guarantee. Duffy's Pure Malt Whiskey has stood severe tests for forty years, and has always been found absolutely pure and to contain great medicinal properties.

CAUTION.—When you ask you druggist or grocer for Duffy's Pure Mait Whiskey, be sure you get the genuine. It's the one absolutely pure medicinal whiskey, and is sold in sealed bottles—never in bulk. Look for the trade-mark, the "Old Chemist," on the label, and make sure the seal over the cork is unbroken. Price, \$1.00. Medical booklet and doctor's advice free. Philip Sousa appeared before the Joint Committee on Patents of the Senate and House to discuss the new copyright bill. Mr. Sousa frankly said at the outset Mr. Sousa frankly said at the outset he was there in his own interest. He wanted money for the reproduction of his musical compositions on "talking machine." Then he startled the committee with the prediction that human vocal cords were fast becoming useless, and in a little while there would be no singing all because of the talking machine. "Every one of these concerns," said Mr. Sousa, referring to the manufacture of talking machines, "has from twenty to one hundred of my compositions in its

"I was born in this city. I am fifty years old. When I was a boy here the young people sat on their stops and porches in the evening and sang the old songs and the new ones. If you walk down a Washington street in the evening you will not hear these young voices. You will hear these infernal machines.

"Last summer I was in one of the famous symmer resorts, where were congregated the swellest yachts of the country. I went among them, and in place of the usual songs of the water in the evening what did I hear? 'El Capitan' on, the talking machine.

"I tell you the human vocal cords are going into decay and the talking machine is taking their place.

"Why, these machines managers will pay Caruso \$3,000 to sing one song of the mas a record. They will-pay best cornet players \$4 a tune for them. That shows the value of the human voice. And yet the composer of the song or of the place does not get a cent for his composition."

Sentor Reed Smoot ventured the suggestion that from his observation the people.
